ADAPTER PLATES

- ▶ Conveniently locates AV connectivity within reach of the system user
- ▶ TMK 120 AAP and TMK 130 AAP mount up to three AAPs, depending on the version
- ▶ TMK 120 R supports up to two Extron Retractor cable retraction modules
- ▶ TMK 110 D accommodates one single-gang decorator-style module
- ▶ Mounting hardware included
- ▶ Available in a durable black finish

Extron TMK 100 Series table mount kits bring AV connectivity and control within easy reach of the user. Mix and match TMK 100 mounts to create the right connectivity solution for any application.

Extron Electronics
INTERFACING, SWITCHING AND CONTROL

DESCRIPTION

The Extron **TMK 100 Series** are compact, under-table mounting kits for Extron Retractor cable retraction modules, decorator-style modules, and active or passive AAP - Architectural Adapter Plates. These kits can be mixed and matched to provide the right combination of AV connectivity and control to table edges, within easy reach of the user. TMK 100 Series mount kits feature rounded edges and corners to prevent clothing snags. They also feature flush sides to mount multiple units seamlessly side by side. TMK 100 Series mount kits install beneath the furniture surface and are ideal for applications where furniture cannot be cut to support AV connectivity.

The **TMK 120 AAP** supports up to two single-space AAPs, while the **TMK 130 AAP** supports up to three AAPs. The kits utilize a simple two-piece design for ease of installation and assembly. The top portion of the kit provides full access to the AAP mounting lugs, washers, and nuts, as well as convenient keyhole openings for attachment to the table surface. The bottom portion mounts to the top portion, and surrounds and protects the connectivity plates and attached cables.

The **TMK 120 R** mounts up to two Extron Retractors close against the furniture surface, providing maximum leg room beneath it. The kit includes brackets to support both the user end of the Retractor at the table's edge and the under-table portion of the module housing for a secure installation.

The **TMK 110 D** is an under-table mount which places AV and control decorator-style modules close against the furniture surface. The top portion of the mount provides convenient keyhole openings for attachment to the table surface. The TMK 110 D is compatible with Extron active modules such as DTP T HWP 4K 231 D DTP Transmitter, EBP 108 D eBUS button control panel, and pass-through WPD Series wallplates.

TMK 100 Series mount kits include all necessary mounting hardware and are available in a durable black finish.

KEY FEATURES

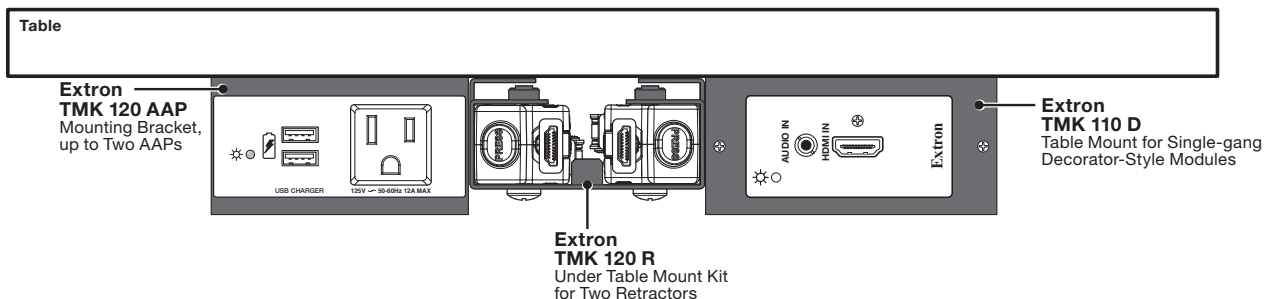

- ▶ **TMK 120 AAP and TMK 130 AAP mount up to three AAPs, depending on the version**
- ▶ **TMK 120 R supports up to two Extron Retractor cable retraction modules** – Included brackets support both ends of the Retractor module for a secure installation.
- ▶ **TMK 110 D accommodates a single-gang decorator-style module** – Use with Extron's active and pass-through single-gang modules for convenient access to AV connectivity and control.
- ▶ **Mounting hardware included**
- ▶ **Available in a durable black finish**
