

VNM Software Decoder

SOFTWARE DECODER FOR
VN-MATRIX® 225 OR 200 SERIES

- ▶ PURE3 decoder plug-in for Microsoft Windows Media Player
- ▶ Software decoder application provides basic source selection
- ▶ Decodes content from VN-Matrix 225 or 200 products
- ▶ Compatible with Windows based platform
- ▶ Installs quickly and simply on any standard PC
- ▶ Install decoder on as many endpoints as desired

PURE 3® CODEC
OPTIMIZED FOR NETWORKS

The VNM Software Decoder enables a user to view PURE3® streams derived from one of Extron's VN-Matrix 225 or 200 Series products on a LAN or private network supporting multicast traffic. Both live and recorded streams in playback on a network can be selected for viewing. The VNM Software Decoder provides a flexible, easily accessible, and cost-effective alternative to hardware decoding for users who may only need to access a PURE3 stream on a casual or intermittent basis.

Extron® Electronics
INTERFACING, SWITCHING AND CONTROL

DESCRIPTION

The **VNM Software Decoder** application lets users view live PURE3 streams from VN-Matrix® 225 or 200 encoders as well as PURE3 recorded streams in active playback on the network. The Software Decoder consists of a plugin that works with Windows Media Player as well as a software application that connects to a VN-Matrix Enterprise Controller. The application finds the available encoders and active recorder channels and populates buttons, making them available for selection with a simple button press. Connections to PURE3 streams can also be initiated from the embedded VN-Matrix Web browser interface or by typing in the URL for the Encoder or Recorder stream into Windows Media Player.

VNM Software Decoder can be installed on as many machines that may need to access PURE3 streams as desired, and a system license manages the number of connections that can be made simultaneously. The VNM Software Decoder is ideal for use in monitoring, remote presentation viewing, collaboration, data visualization, or any application where a low-cost, convenient alternative to hardware-based PURE3 decoding is desired.

The software decoder is intended for use on LANs or managed private networks that support the use of multicast traffic.

FEATURES

- ▶ PURE3 decoder plug-in for Microsoft Windows Media Player
- ▶ Software decoder application provides basic source selection
- ▶ Decodes content from VN-Matrix 225 or 200 products
- ▶ Compatible with Windows based platform
- ▶ Installs quickly and simply on any standard PC
- ▶ Install decoder on as many endpoints as desired

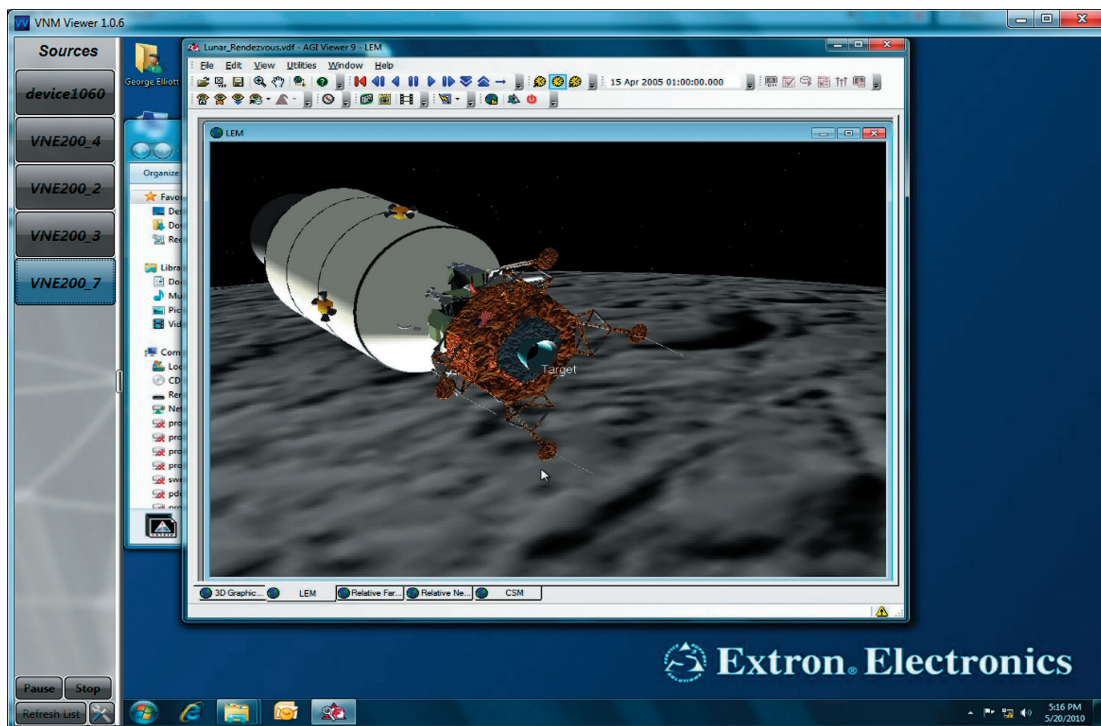

Requirements

- ▶ VN-Matrix Enterprise Controller - Licensing managed by controller
- ▶ Wired or wireless network connection to computer
- ▶ Microsoft Windows XP or later
- ▶ Windows Media Player 11
- ▶ VN-Matrix 225 or 200 encoded input
- ▶ Progressive scan encoder input
- ▶ Network routing and switching of multicast traffic

Recommended System Requirements

- ▶ 3 GHz Pentium IV or higher processor
- ▶ Network routing and switching equipment that supports IGMP snooping and query
