

Retractor SM Horizontal Bracket • Installation Guide

The Cable Retractor SM series requires this mounting bracket for horizontal installations. Use the Horizontal Mounting Bracket to fix the Retractor under the table. Slotted holes allow for tolerance in placing the bracket.

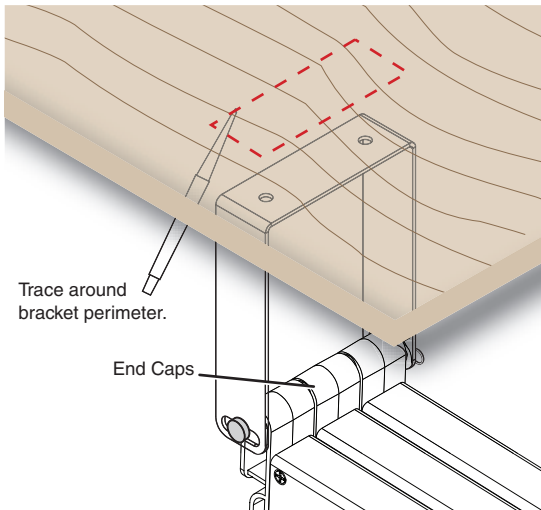

See the *Retractor SM Installation Guide* at www.extron.com prior to beginning this installation.

ATTENTION:

- Ensure the supplied screws do not pierce through the top of the table. If necessary, use appropriate screws based on the table material and thickness.
- Assurez vous que les vis fournies ne transpercent pas la surface de la table. Si nécessaire, utilisez des vis plus appropriées en fonction du matériau de la table et de son épaisseur.

To ensure accuracy follow these procedures:

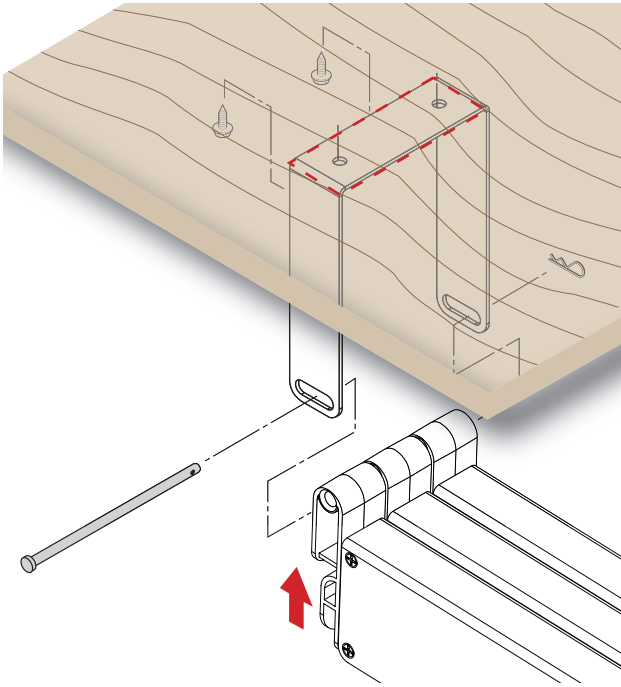

1. With the Retractors installed in the enclosure, attach the horizontal mounting bracket to the Retractor end caps using the provided pin and clip.

2. Raise the Retractors with attached bracket to the desired mounting location.

NOTE: Be certain the system is perpendicular to the enclosure to prevent binding of the pulley system.

3. Ensure the bracket is flush with surface and trace a line around the bracket perimeter.
4. Lower the assembly and remove the Horizontal Bracket from the Retractors.

5. Position the bracket inside the lines drawn in step 3 and fasten with the supplied screws.

6. Raise the Retractor system up into the installed bracket, run the pin through the bracket and end caps, and secure with the supplied clip.
