

## **MAAP 101EU/EUC and MAAP 102EU/EUC Installation Instructions**

The Extron MAAP 101EU and MAAP 102EU are wall plates that you install into Legrand® Mosaic™ external wall boxes. The 101EU supports three single-space MAAPs and mounts on an 80 mm x 80 mm Legrand external wall box. The 102EU supports six, single-space MAAPs and mounts on an 80 mm x 148 mm Legrand Mosaic external wall box.

The MAAP 101EUC and MAAP 102EUC are the same wall plates as the EU models, but include steel mounting brackets that allow installation into most 80 mm wide Euro Channel boxes. The mounting brackets clamp the MAAP plate into the channel.

1. Cable the mounted external wall box or Euro Channel. If applicable, refer to the cabling information in the documentation for the MAAP.
2. Thread the cables through the mounting plate.

**For EUC models:** Insure that the cable is threaded through the mounting bracket inside the Euro Channel before adding the MAAP mounting plate.

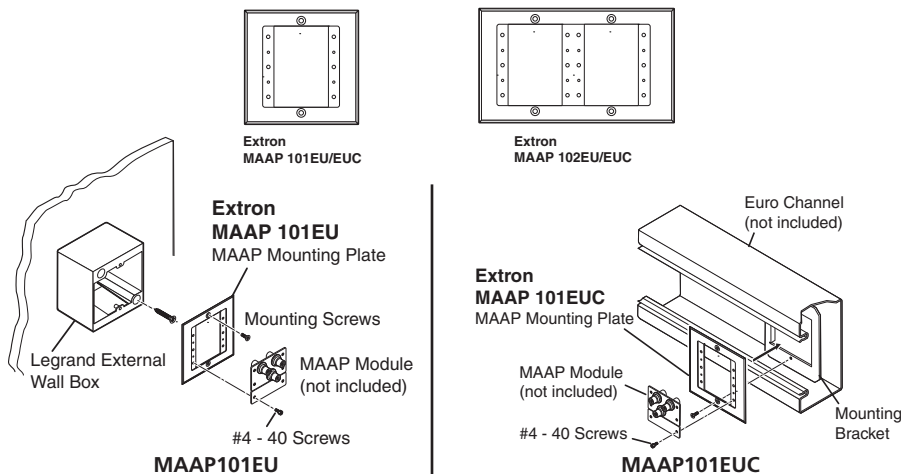

3. Attach cables to the rear of any MAAP module(s).
4. Insert the provided screws through the holes in the MAAP mounting plate and module(s) to clamp the components into place.

See the figure(s) on the reverse of this card.

**NOTE** The screws needed for installing the product are included.

**NOTE** Installation of the MAAP 102EU and EUC is similar to that shown on the reverse of this card.
