

NETXA Male-Female RJ-45 Crossover Adapter

The Extron NETXA Male-Female RJ-45 Crossover Adapter is a 3' length of Category (CAT) 6 cable that is terminated as a crossover cable with a male RJ-45 connector on one end and a female RJ-45 connector on the other end. Crossover cables allow direct connection (non-network) between two IP enabled devices. With a NETXA adapter, an installer can carry only patch (straight) cables of various lengths for installation jobs and then use the adapter if necessary.

NOTE The total length of all Ethernet cables and adapters is limited to 328' (100 m).

See the pin assignment drawing on the reverse side of this card.
